Dear Friends:

You are cordially invited to the 2nd Women in Engineering, Science, and Technology (WiEST) Symposium to be held on **Saturday, January 27, 2018** (2-6 PM) at Asian Civilization Museum, followed by an Award Dinner at the Fullerton Hotel.

The half-day event will feature a Plenary talk by Professor Frances Arnold of California Institute of Technology (CalTech) who is the first woman to be awarded the Millennium Technology Prize for "Pioneering Directed Evolution" – a molecular engineering tool that revolutionizes how we engineer biology with many industrial implications.

Other speakers include academics (NTU, NUS) and directors/CEO from Shell, HP, Merck, Veredus who will share the frontiers of innovations in their respective fields that are pharmaceutics, membrane technology, health data managements, nanotechnology, and biosensors.
More information on the event can be found online: http://www.ntu.edu.sg/conference/wiest/2018/.
