29 October 2021 | From ***2.30pm*** on Zoom!

Guest: ThermoFisher SCIENTIFIC

Host:

Jocelyn Ng
Senior Associate,
Business Development
(RSC)

Co-hosts:

Angeline Kan
Marketing Manager
Laboratory Plastics Essentials
Thermo Fisher Scientific

Tay Wei Hong, Ph.D, FRMS.
Product Manager
Liquid Handling Solution
Thermo Fisher Scientific

The ART of Pipetting – Techniques and Tips

Liquid transfer is indispensable in experimental work. The precision and accuracy of the transfer process can influence the result outcome. With increasing sensitivity and assay miniaturization, accuracy and precision in the liquid transfer process has never been more important.

In this talk, we will guide users on the ***different pipetting techniques, when to use them and how to perform them***. We will also discuss about the ***factors that can influence pipetting accuracy/precision and how to minimize them***. Finally, we will share ***tips on selecting the correct pipette tip for specific applications.***
