Biology of Aging

22nd - 24th October 2015

Grand Copthorne Waterfront Hotel, Singapore

Senescence, Regulation and Intervention

About the Biology of Aging Scientific Conference

"Singapore as well as most of industrialized countries will be facing the grey tsunami. Research experts and leaders in the field will discuss various biological aspects of aging which includes cellular senescence, effects of nutrition and associated signaling pathways, inflammation and immune resolution and studies on intervention in the aging process. The clinical, genetic, immune, metabolic and cognitive aspects of aging will be covered together. Past, current and future interventional strategies in humans and models will be discussed. Scientists, clinicians and groups interested in the the Biology of Aging are welcomed to attend this scientific forum. A*STAR and NUHS are very pleased to host you in the heart of Asia."

Confirmed Speakers

Keynote

Dame Linda PARTRIDGE Institute of Healthy Ageing, UK and Max Planck Institute for Biology of Ageing, Germany

Arne AKBAR
University College London, UK

Nir BARZILAI
Albert Einstein College of Medicine, USA

Judith CAMPISI
Buck Institute of Aging, USA

Luigi FONTANA
Washington University & Brescia University, USA

Claudio FRANCESCHI
University of Bologna, Italy

Bertrand FRIGUET
Pierre and Marie Curie University, France

Tamas FULOP
University of Sherbrooke, Canada

Derek GILROY
University College London, UK

Maxime GUYE
Center for Magnetic Resonance in Biology and Medicine, France

Brian KENNEDY
Buck Institute for Research on Aging, USA

Anis LARBI
Singapore Immunology Network, A*STAR, Singapore

Janet LORD
University of Birmingham, UK

Joao Pedro de MAGALHÃES
University of Liverpool, UK

Tze Pin NG
National University of Singapore, Singapore

Graham PAWELEC
University of Tübingen, Germany

Thomas RANDO
Stanford University, USA

Paul ROSS
University of College Cork, UK

Stephan SIGRIST
Freie Universitat, Germany
