

CANCER SCIENCE INSTITUTE OF SINGAPORE

DISTINGUISHED SPEAKERS' SERIES 2015

Markus Grompe

Director, Oregon Stem Cell Center
 Professor of Pediatrics, Oregon Health and Science University

The Role of Stem Cells in Liver Injury

Date: Monday, 26 October 2015

Time: 11am – 12pm

Venue: LT36, Level 3 Auditorium, Centre for Translational Medicine

(14 Medical Drive, Singapore 117599)

Chair: Prof. Daniel Tenen

Abstract:

[To be updated]

Biography:

Dr. Grompe received his medical degree (Dr. med.) in 1982 at the University of Ulm Medical School in Germany. From 1984-1987 Dr. Grompe was trained in Pediatrics at Oregon Health Sciences University in Portland, Oregon, USA and then moved to Baylor College of Medicine in Houston, Texas. There he was a fellow sponsored by the Pediatric Scientist Training Program in the Institute for Molecular Genetics from 1987-1991 and worked on gene therapy for inherited diseases, particularly metabolic liver disorders. In 1991, Dr. Grompe joined the faculty at Oregon Health & Science University and he is currently Professor in the Departments of Pediatrics and Molecular and Medical Genetics. He is a recipient of the E. Mead Johnson award for pediatric research (2002) and the Merit Award of the Fanconi Anemia Research Foundation (2002). He is involved in the clinical care of patients with genetic diseases as well as scientific investigation. In 2004 he became the first director of the newly founded Oregon Stem Cell Center. Since 2008 he is the holder of the Ray Hickey Chair and the Director of the Papé Family Pediatric Research Institute.
