

BIOLOGY COLLOQUIUM

Friday, 23 Oct 2015 | 4pm | DBS Conference Room 1

Hosted by Dr Ng Ngan Kee

The pathology of **King Richard III**

By **Guy Nathan Ruty**

Chief Forensic Pathologist, University of Leicester

This talk will summarise the investigation of the discovery and identification of the remains of King Richard III. It will illustrate how modern forensic techniques were applied to address the identification and cause of death.
