Workshop on
Molecular Imaging in Biomedical Research

Invitation for Participation

19 November 2015, 10.00am – 1.00pm
Aspiration Theatrette
Level 2M, Matrix Building, 30 Biopolis Street

The Singapore Bioimaging Consortium (SBIC) and Clinical Imaging Research Centre (CIRC) jointly invite you to the Workshop on Molecular Imaging in Biomedical Research (MIBR).

SBIC aims to create a nationwide multidisciplinary research platform for biologists, chemists, physicists, electrical/electronics engineers, computer scientists as well as clinicians to work together on strategic bioimaging projects.

CIRC aims to serve as a national shared imaging resource for clinical research in humans. CIRC is positioned as a national facility that encourages collaborations between a broad range of researchers from multidisciplinary backgrounds, including scientists, clinicians and engineers, and across institutions in Singapore.

The MIBR workshop serves to bring together local imaging experts and biomedical scientists who are keen to use imaging to study their questions. It is hoped that the workshop will allow researchers in Singapore to come together to form strategic research collaborations, and to establish a forum to organize and coordinate molecular imaging in biomedical research activities in and beyond A*STAR. The scientific talks at the workshop will be followed by a networking session cum lunch reception.

Attendance at the workshop is **limited to 80 participants by registration only.** Please register via email with Jenny_SEE@sbic.a-star.edu.sg with the following information:

1. **Full name (family name first) and title (e.g. Prof/Dr/Mr/Ms)**
2. **Designation**
3. **Organisation**

ADMISSION IS FREE

Closing date for registration: 9 November 2015 (Monday)
