Institute of Molecular and Cell Biology

A*STAR

## SEMINAR ANNOUNCEMENT

We would like to invite you to attend this seminar hosted by Prof. Wanjin Hong:

Date: 24 January 2018, Wednesday

Time: 11:00AM – 12:00PM

Venue: Level 3, IMCB Seminar Room 3-46, Proteos, Biopolis

---

**Speaker:** Ms. Alicia Hammon, Business Development Manager, Proteintech Group, USA

**Title**: The Good, The Bad, and The Ugly of The Antibody Market

Antibodies are among the most commonly used reagents in academic and industrial research labs. With hundreds of antibody companies in the market, it is becoming increasingly more difficult to decipher the good antibodies from the bad. Learn what makes a good antibody company, and understand how Proteintech Group manufactures, validates, and guarantees over 10,000 different antibody targets, and has since 2001.

**Biography:**

Proteintech Group was founded in 2002 by a group of scientists, who were actively engaged in NIH funded research at the time. One of the original founders and current CEO Dr. Jason Li was an Associate Professor of Immunology at the University of Illinois at Chicago during the company's foundation years. Part of Proteintech Group's early vision was to make all its own products, to the highest standards possible, and never source a single antibody from any other provider. With one hundred percent original products Proteintech offers its customers sincerity and integrity. You can only buy Proteintech antibodies directly from Proteintech or via one of its approved distributors — when you receive your antibody and see the Proteintech logo on the vial, know that you hold something that is truly unique.
