Singapore Bioimaging Consortium, A*STAR, and the International Society for Magnetic Resonance in Medicine (ISMRM) welcome you to the International workshop on

MRI OF OBESITY AND METABOLIC DISORDERS

July 21-24, 2019
Breakthrough Theatrette, Level 4, Matrix, Biopolis, Singapore

The prevalence of obesity and related metabolic disorders continue to rise worldwide. This workshop brings together internationally recognized scientists and clinicians who are currently developing and applying advanced MRI and MRS techniques to probe biophysical properties of fat and investigate the causes and consequences of obesity and metabolic dysfunction in both adults and children. The program includes advances in fat-water MRI, relaxometry, diffusion, elastography, multi-nuclear applications. This workshop bridges the clinical needs and scientific development to directly impact bench-to-bedside in this area of research.

Trainee funding support: Provided by ISMRM & the International Union of Pure and Applied Biophysics (IUPAB) is available for graduate students & young post-doc's. Apply during abstract submission.

Details of the scientific program are available on the ISMRM website:
https://www.ismrm.org/workshops/2019/ObMet/program.htm

Registration is required and must be done on the ISMRM website at :
https://www.ismrm.org/workshops/2019/ObMet/reg.htm

Abstracts must be submitted at:
https://www.ismrm.org/workshops/2019/ObMet/call.htm
