RESEARCH GRAND ROUNDS

Staying Ahead of the Innovation Race with Artificial Intelligence and Intellectual Property

Advancements in technology and Artificial Intelligence (AI) is transforming how healthcare services are delivered to better serve patients. What are the AI innovations that are out there and how are they being protected? This sharing uncovers the treasure of information from patent publications as well as demystifies the patentability of AI inventions.

Monday, 29 July 2019
PSL-2A, Academia
12.30 to 1.30pm

Buffet lunch will be served from 12:00pm.

Register for free now at
<https://bit.ly/RGR2019>
Register by **24 July 2019**.
CME and CPE points may be awarded.

Speakers

Liu Yixin
Assistant Director, Registries of Patents and Plant Varieties,
Intellectual Property Office of Singapore (IPOS)

Liu Yixin is part of the IP policy team concerning patents and designs, and is involved in the FinTech FastTrack and Accelerated Initiative for Artificial Intelligence Initiative by IPOS to accelerate FinTech and IP patent applications from file-to-grant. Before joining IPOS, Yixin was involved in Singapore's Smart Nation initiative and was responsible for developing future capabilities and technologies in enhancing Singapore's water infrastructure business and strategic planning.

Danny Yap
Patent examiner, Search and Examination Unit
IPOS International

Danny Yap specialises in the patenting of computer related inventions, and is concurrently part of a team that examines issues related to patentable subject matter. Prior to joining IPOS International, he was a principal staff at DSO National Laboratories performing experimental work in the area of pulsed power and plasma physics as well as an Adjunct Senior Research Scientist at Temasek Laboratories at the National University of Singapore.
