

webinar
**MULTI-SCALE CLINICAL
OPTOACOUSTIC
SKIN IMAGING**

Presenting the use of:

RASTER SCANNING
OPTOACOUSTIC MESOSCOPY (RSOM)

MULTISPECTRAL
OPTOACOUSTIC TOMOGRAPHY (MSOT)

in the investigation of skin diseases
(inflammation & cancer)

JUNE 25th
2:00PM CEST / 8:00AM EDT

In this webinar held on June 25th, Dr. Dinish U. S and Dr. Chris Ho from SBIC will present on the use of Multispectral Optoacoustic Tomography (MSOT) to study morphological and functional changes associated with skin cancers in 2D and 3D.

They will also describe the use of high resolution Raster Scanning Optoacoustic Mesoscopy (RSOM) as an investigative tool for inflammatory skin conditions as well as the outlook for OAI to aid clinicians in the diagnosis and therapeutic monitoring of skin disease.

June 25th, 2020 @ 2:00 PM CEST / 8:00 AM EDT
