RESEARCH GRAND ROUNDS

Biodiversity Medicine for Human Health and Wellness

Biodiversity refers to variety and variability of all lifeforms in their ecological environments, and it contributes significantly to human health and well-being. The application of botany knowledge to treat disease and promote health has been prevalent since time immemorial.

The Institute of Biodiversity Medicine (BD-MED) aims to drive and accelerate biodiversity research that can promote all aspects of human health and wellness. It has three signature programs: 1) Herbal Biodiversity and Medicine, 2) Food Biodiversity and Nutrition, and 3) Urban Biodiversity and Wellness. Examples of specific projects will be presented and discussed at this presentation.

Wednesday, 29 September 2021
via Zoom
12:30pm to 1:30pm

Register for free now at
